Angela Bowman
Artisun Solar
Kansas City, MO 64131

Dear Angela,

This letter is to inform you and verify that all things that were promised were delivered with the addition of our solar panels on our two companies.

Artisun Solar was the only company that responded to my request for solar in a satisfactory manor. They helped with the grant process from start to finish. All grant money was received as predicted as well. We have been self sufficient for electric power for 8 months out of the year, with only a charge for delivery. We have drastically reduced our Com-Ed consumption of power, as promised.

Installation of the system went well even though it was in then winter which delayed a scheduled date. It was completed with little problem and we allowed the vendor to use our own manlift top access the roof. No real impact on our day-to-day operation was experienced. They were a little lax on their cleanup is all.

The only heartburn I had with doing the project was when the application had to be extended as it had taken more time than anticipated after approval. It was handled with an extension through the REAP Grant, and Artisun's team was very helpful.

I would recommend Artisun and solar to someone looking for a vendor and a cost saving way to save money on utility bills. Our Return on Investment was as promised, a year from installation. Net saving looks like as projected of about $320,000.00 over a 30 year period.

Angela, overall it was a great decision to go with Artisun and solar power. I would do it again in a heartbeat.

Sincerely,

Steve Foster, President
